

HI, THANKS FOR PURCHASING MY ASSETS.!

PLEASE READ THIS DOCUMENTATION HOW TO USE THE ASSETS

1. Project Structure.

This project is very simple to implement with your own project and you'll know after use that.

The project is containing :

- a. Css folder : where the css style is located.
- b. Img folder : where the images assets used (you can change or replace all with your own images.
- c. Js folder : where the javascript code located to make a cool animation.
- d. Preview : where the preview of assets when you open in browser.
- e. And 3 html files (index, registration, and forgotpassword) there's all the HTML file and its very easy to costumized and make your own.

2. How to change image assets with your own image ?

To change images where used you can go to "img" folder and then replace all you need. NOTE! : keep the filename is same when you replace the images or you can change the images name on html file.

That's all, once again thanks for purchase my assets. Hope you like that. If you have any problem just feel free to ask me on andimardimansaputra@gmail.com I'll help you as soon as possible.

Thanks.

Regards, mrdyman.
